**CARE GUIDE**

### Sweep & Vacuum

Sweep with a soft brush or vacuum with a hard floor attachment (no beater bar) to remove grit that can scratch the wear layer.

### Mopping

Use a damp mop to clean with a wood floor cleaner suitable for lacquered wood. Excess water can cause swelling and damage to the topcoat. Never use steam cleaners.

### Furniture

Use a damp mop to clean with a wood floor cleaner suitable for lacquered wood. Excess water can cause swelling and damage to the topcoat. Never use steam cleaners.

### Spills

Wipe up spills immediately. Standing liquid can cause damage overtime. Dry the area after spill occurs. Avoid liquid seeping through joints.

### Avoid Chemicals

Do not use bleach, ammonia, or abrasive powders. Steam mops are not recommended, as excessive heat and moisture can weaken the click joints and damage the floor.
