

# WOOL-BLEND CARPET CARE GUIDE

## Vacuum

Vacuum your wool blend carpet at least twice a week to remove dirt and dust before they get embedded into the fibres.

Looped Carpets - Do not brush vacuum to prevent pilling.

## Cleaning

Place doormats at entrances and encourage removing shoes indoors to reduce dirt and grit tracked onto the carpet, which can wear down the wool fibres.

## Furniture

Periodically move furniture and rugs to prevent uneven wear and flattening of the carpet pile, keeping the wool fibres looking fresh.

## Spills

Blot spills immediately with a clean, dry cloth or paper towel—don't rub, as this can spread the stain and damage fibres. Use a mild wool-safe cleaner if necessary

## Chemicals

Have your wool blend carpet professionally cleaned every 12-18 months. Avoid harsh chemicals and opt for wool-safe cleaning services.
